

Team 5019 Gearbox Heroes And FIRST Robotics Competition Presents....

Destination: Deep Space

This year, we'll be blasting off into Deep Space with 2019's FIRST Robotics Competition theme. To understand how the game is going to be played, please watch the short animation video that was revealed on Kickoff to all the teams.

Each alliance has two rockets and one shuttle on their half of the field. The robots begin each match on raised platforms directly in front of the drivers' stations. Our robot is currently is being designed to filling the rockets with cargo and securing them with hatches. However, as we get into more prototyping and fabrication, that may change slightly.
